Resume Objective

Motivated Junior Software Engineer seeking an opportunity to apply and grow practical skills in React.js and Node.js development. Aiming to contribute to real-world projects, write clean and maintainable code, and continuously improve as a professional software engineer.

Skills

- JavaScript (ES6+), React.js, Node.js, Python, FastApi, Django Rest Framework
- RESTful API Development, JWT Authentication
- MongoDB, MySQL (basic)
- Git, GitHub, Postman, Swagger
- Problem-solving, Team collaboration, Self-learning

Education and Qualifications

Bachelor's Degree in Software Engineering

Samarkand State University, Samarkand (2022 – 2026 Expected)

Currently pursuing a Bachelor's degree in Software Engineering. Gaining strong theoretical and practical knowledge in programming, software development, and information technologies. Actively working on academic and personal projects.

Academic Lyceum

Samarkand State University's Lyceum, Samarkand (2020 – 2022)

Secondary Education

School No.38, Dahbed town, Samarkand region (2011 – 2020)

Interests

- Web development and modern software technologies
- Coding and building practical software projects
- Continuous learning in software engineering

Projects

Web Application Projects (Academic & Personal)

- Developed full-stack web applications using **React.js, Node.js, and MongoDB**.
- Implemented user authentication and authorization using **JWT**.
- Designed and tested **RESTful APIs** for frontend–backend communication.
- Worked with role-based access control (admin, user).
- Focused on clean code, scalability, and maintainability.

Experience

Junior Software Engineer (Academic & Personal Projects)

2023 – Present

- Built and maintained web applications as part of academic coursework and self-driven projects.
- Integrated frontend interfaces with backend services.
- Tested APIs using Postman and documented endpoints with Swagger.
- Collaborated with peers on small team-based projects.

Languages

- **Uzbek** – Native
- **English** – Intermediate (technical reading, documentation, communication)
- **Russian** – Intermediate

Additional Information

- Strong interest in modern web technologies and software architecture
- Able to work independently and in team environments
- Open to learning new tools, frameworks, and best practices
- Ready for internships, junior-level positions, and long-term growth

Technical & Analytical Background

- Strong background in **Mathematics and Physics**, supporting advanced analytical and logical thinking.
- Experienced in mathematical problem-solving and abstract reasoning, applicable to algorithmic thinking and software development.
- Solid understanding of physics fundamentals, enabling structured, system-oriented, and cause–effect based problem analysis.
- Ability to apply theoretical knowledge to practical engineering and software solutions.

Core Competencies

- Mathematical & Logical Thinking
- Analytical Problem-Solving
- Algorithmic Reasoning
- Physics-Based System Thinking
- Attention to Detail
- Structured and Critical Thinking
